SensorCONNECT

SVL - 0-10V ATHENA

SVE - 0-10V ENLIGHTED

Sensors and nodes connect fixtures to lighting control system and respond to the dynamics of a space. The Sensor controls ALL lights that are connected together up to the next sensor in the same row.

Multiple sensors provide separate zone control.

LED Module, Power Cable and Sensor for LUTRON® Athena supplied by i2Systems®. Controls by others.

ALL lights automatically determine if a sensor is plugged into it.

Connector not used on Corner LED Modules. The first LED module must include a Sensor. Sensor Connect LED modules supplied in 18" & 48" lengths.
